To: Justice Committee  
From: Bill Keller  
Subject: EMA May Activity Report  
Date: May 26,2009

As I advised you last month the Swine Flu or Now H1/N1 Flu kept the department Active the first part of the month with receipt of the SNS, (Strategic National Stockpile) reviewing our distribution plans, and monitoring on going intelligence provided by the CDC and Champaign Urbana Public Health District. I had advised you back in March of An upcoming exercise of infectious disease affecting Champaign County. Well this real world flu event has met or exceeded what we were planning on doing in the exercise. The only part of the real world event we did not do was mass dispensing of meds to the Public. To test this part of our plan we will be doing a dispensing event in early June and send the results to the State to receive exercise credit for part real event and part exercise.

The later part of the month brought severe weather situations causing activation of the Emergency Operation Center. Several reports of wind damage and street flooding were made. There were no reports of personnel injury and only 1 report of major structural damage in the Homer area.
