To: Justice Committee
From: Bill Keller Director
Subject: October & November Activity Report
Date: November 30,2009

The past 2 months have been very active working with CUPHD on the planning and the logistics for vaccinating school children and the public against the H1/N1 Flu virus. I would like you to know that CUPHD is a leader in the state in the vaccination process and is setting the best practice standard. We have received another SNS (Strategic National Stockpile) shipment that contained additional personal protective supplies and pharmaceuticals.

We are in the beginning stages of designing a full-scale exercise at Willard Airport. This exercise is being designed to test the response to a aircraft accident as well as working with the hospitals disaster plans. We will also be exercising the command and control of the event and will require participation of 8 or 9 public safety departments.

I have been involved in several State meeting on grant funding for Emergency Operation Centers and grants to collages and universities for security enhancements. When available we will be applying for grant funds to add additional equipment to our Emergency Operation Center. I will keep you informed.
