## **Introduction**

In 2015, Champaign County was awarded a Justice and Mental Health Collaboration grant to pursue a coordinated planning process to analyze criminal justice needs for the justice-involved population with mental health and co-occurring mental health and substance use needs. This report summarizes the findings and recommendation of the planning effort.

### *Background*

In 2012, the Champaign County Board contracted with the Institute for Law and Policy Planning to conduct a comprehensive criminal justice needs analysis. The report identified key recommendation themes, which include implementing risk and needs decision making tools; improving data, data analysis, and evaluation capabilities; and formalizing a Criminal Justice Executive Council. In addition, the Champaign County Board appointed a community justice taskforce with representatives from behavioral health (BH) treatment providers and community stakeholders, to prepare recommendations regarding the adult system of care within the criminal justice system, to reduce bookings, bed days, and recidivism. The recommendations included the use of evidence-based practices, improved access to mental health (MH) services, enhanced post-incarceration treatment options, and implementation of a system of care approach.

Since the distribution of the above-mentioned reports and recommendations, a number of activities have been undertaken to address various identified needs. These include the installation of BH providers in the jail, implementing book and release practices, increasing the number of law enforcement (LE) officers receiving Crisis Intervention Team (CIT) training, and allocating county funding to support a Reentry Program and Council. Still, gaps remained.

Faced with a significant frequent recidivist population at the jail, many of whom were identified as having previously received services from community BH providers or were recognized as needing such services; the Sheriff's Office started a community conversation around mental health, criminal justice, and recidivism. This included discussion of the possibility of opening a Community Assessment Center (Center). The Center was envisioned as a place where law enforcement (LE) could take people they encountered who were disruptive, but posed no serious threat to themselves or others. LE could drop these people off at the Center where they would receive available services and linkage to additional supports, thus mitigating the utilization of scarce LE time and resources by detaining these people unnecessarily.

### **Justice and Mental Health Collaboration Program – Planning Grant**

In October 2015, Champaign County was awarded a two-year Justice and Mental Health Collaboration Program (JMHCP) planning grant by the US Department of Justice (DOJ), for which the Champaign County Mental Health Board (CCMHB) provided matching funds. The purpose of the grant was to assist the community with identifying systemic gaps and planning for the development of resources, for persons with mental illness (MI) or co-occurring mental health and substance use disorders (COD) who come into contact with local law enforcement and the county jail.

The Champaign County Sheriff's Office and Rosecrance Champaign/Urbana (RCU) (formerly Community Elements) jointly administered the grant. In addition to funding support, JMHCP grant recipients received technical assistance (TA) from TA Providers at the Council of State

Governments Justice Center (CSG). This involved monthly conference calls between the Sheriff's Office, JMHCP staff, and the TA Providers, as well as an onsite visit from the Providers during the planning phase. The initiative took shape with four nationally recognized goals in mind:

1. Reduce the number of people with MI/COD booked into the jail
2. Reduce the length of time people with MI/COD disorders stay in the jail
3. Increase linkage to community-based services and supports by people with MI/COD who are released from the jail
4. Reduce the number of people with MI/COD returning to jail

This report details those activities and the progress made as a result of the work involved throughout this planning process.

### **Crisis Response Planning Committee**

#### *Meetings*

The Crisis Response Planning Committee (CRPC) was a formal body developed to oversee planning grant activities. The CRPC was formed upon receipt of the grant award, and met monthly for the duration of the project. Smaller task groups were formed to address various components of the project, such as data, peer support, screening and assessment, and sustainability.

Terms of the grant required completion of a Planning and Implementation Guide (Guide), developed by the TA Providers. The Guide functioned as a workbook for each step of the planning process, to assist grantees in completing required activities within the assigned timeframe. When working to complete the Guide, the CRPC learned the extent of the dearth of information that exists regarding prevalence rates of people with MI and/or substance use disorders (SUD) in jails, including the Champaign County Jail. There was a need to define some basic terms, in order to better identify the population this work would be addressing, as well as gather information from the community, including consumers and consumer advocates.

#### *Decisions*

The Data Task Group discussed system needs and capabilities. As a result, the CRPC was presented with and agreed on definitions for the terms *mental illness* (MI), *substance use disorder* (SUD), and *recidivism*. Information and definitions were derived from reviewing the State's definition and funding guidelines for *mental illness*, and review of the Diagnostic and Statistical Manual 5<sup>th</sup> Ed. (DSM-5), SAMHSA, and materials provided by our TA Providers and the Stepping up Initiative.

- **Mental Illness** as defined by the DSM-5 is a syndrome characterized by a clinically significant disturbance in an individual's cognition, emotion regulation, or behavior that reflects dysfunction in the psychological, biological, or developmental processes underlying mental functioning.

\* This term encompasses co-occurring substance use disorders, as well as serious mental illness (SMI) or serious and persistent mental illness (SPMI), which are defined as a

mental, behavioral, or emotional disorder that is diagnosable within the past year, is chronic or long lasting, and results in a significant impairment in social, occupational, or other important areas of functioning. In Illinois, a determination of medical necessity is required to receive reimbursement for any services.

- **Substance Use Disorder**, as adapted from Substance Abuse and Mental Health Services Administration SAMHSA, October 2015, <http://www.samhsa.gov/disorders/substance-use>, is a recurrent use of alcohol and/or drugs that causes clinically and functionally significant impairment, such as health problems, disability, and failure to meet major responsibilities at work, school, or home and when an individual experiences impaired control, social impairment, risky use, and pharmacological criteria defined in the 5<sup>th</sup> Ed.

\*SUDs are defined as mild, moderate, or severe to indicate the level of severity, which is determined by the number of diagnostic criteria met by an individual.

- **Recidivism** (as defined by the Reentry Council of Champaign County) is receipt of a new judgment within three years of release from incarceration.

The CRPC also recommended the use of validated screening tools:

- Brief Jail Mental Health Screen (BJMHS) to identify a possible mental illness
- Texas Christian University Drug Screen (TCUDS V) to identify a possible substance use disorder
- Level of Service – Revised: Screening Version (LSI-R:SV) to determine level of criminogenic risk, needs, responsivity, and service delivery

These screening instruments, in addition to identifying possible presence of disorders and the likelihood of recidivism, provide a consistent method for tracking prevalence of disorders and levels of criminogenic risk for all persons booked into the jail, and guide service planning.

During the April 2016 Stepping Up conference, the American Psychiatric Association (APA) announced work to develop an e-screening tool, replete with validated screening instruments, for administration by correctional staff, to collect and track prevalence data of individuals with MI/SUD/COD booked into local jails. Project staff were pursuing implementation of the web-based APA tool, designed to provide initial screening and demographic information. However, due to concerns for individual protection of personal information, and integrity of the data, we suspended implementation following the testing period.

In an effort to move toward implementing the screening process, and begin collecting much needed prevalence data re: the number of people with MI/COD booked into the jail, the jail trained a handful of correctional staff and began administering the BJMHS and TCUDS on paper. In addition, Dr. Zhang, Data Consultant for the JMHC planning grant, developed a database, based on the APA's e-screening application, with each validated tool, for use by the jail. This format allowed the jail to house individuals' screening information locally, and reduced the risk of breaching inmates' personal information.

As of March 7, 2017, every person booked into the Champaign County Jail receives the BJMHS and TCUDS screening, administered and scored by a correctional officer. This process will indicate the need for additional screening and possible assessment by a clinician, as well as allow for the collection and tracking of prevalence data. Preliminary data indicates that approximately 30% of people booked into the jail are indicated by screening as having MI/COD.

### *Information Gathering*

Information gathering took shape in multiple contexts, which included a community survey available to the public, specialized focus groups, and two public dialogue sessions. Altogether, information was obtained from approximately 200 individuals through these various methods. Specifically, information was gathered from the public, Reentry Council, Crisis Response Planning Committee, IPLAN Access to Care and Behavioral Health Group, University of Illinois Campus Behavioral Health Providers, AA/NA Support Group, NAMI Champaign County, leaders from Salem Baptist Church and Bethel African Methodist Episcopal Church, and community members. In addition to the above, a focus group was conducted with inmates currently in the Champaign County Jail.

This public input process provided a clearer understanding of both the real and perceived gaps in treatment and services throughout the community, as they pertain to the stated population. Throughout this process, common themes emerged, including:

### ***Education/Prevention Opportunities***

- Building community awareness of behavioral health issues to lessen the stigma surrounding mental health and substance use disorders
- Increasing service providers' knowledge of community resources, for consistent dissemination of information across systems and agencies
- Prioritizing prevention services in the community to address a wide variety of behavioral health needs
- Expanding opportunities to voluntarily share information with law enforcement regarding triggers, mental health challenges, and safety plans for specific residents
- Developing a Quick Response Model or First-Episode Psychosis Model, for provision of early treatment and wrap-around services
- Provision of a Co-Responder Model
- Increasing Mental Health First Aid (MHFA) and Crisis Intervention Team (CIT) training among LE
- Increasing the provision of community (public, family members, and providers) training events on the fundamentals of MHFA
- Increasing training opportunities and workshops for specialized groups on topics such as boundaries and support, CIT, Motivational Interviewing, and Stages of Change, and opioid addiction

### ***Access to Psychiatric Care – Capacity***

- Increasing access to psychiatry, psychiatric medication, and mental health services, in both the community and inside the County Jail
- Improving communication with psychiatrists
- Promoting continuity of care for individuals both entering and leaving jail

- Provision of Navigators or Transitional Specialists, to assist consumers with understanding and navigating various systems (housing, medical, benefits)
- Increasing and expansion of programming in the jail, including counseling, parenting classes, AA/NA groups, Moral Reconciliation Therapy (MRT) groups, etc.

### *Specialized Housing*

- Expanding housing options, including long-term recovery housing for specific target populations (persons with mental disorders, persons in long-term recovery for substance use disorders, those reintegrating into the community from incarceration, and those who are homeless)
- Developing specialized housing units in the jail for those with MI/COD
- Developing a space for medical detox, both in the community and in the jail
- Developing an Assessment Center as an alternative to incarceration (for persons with SUD or MI who come into contact with LE) that will include, but not be limited to, an array of the following:
  - a. Drop Off for Law Enforcement
  - b. Access to Assessments and Crisis Intervention
  - c. Psychiatry Services
  - d. A living room model that includes onsite access to wrap-around services
  - e. Crisis Stabilization Residential Services
  - f. Detox Services
  - g. 23 hour hold beds
  - h. Linkage to a continuum of care for persons with behavioral health disorders, as well as those who are experiencing or are at risk of homelessness

### *Sequential Intercept Model Mapping*

From July 2016 to January 2017, the CRPC completed a CJ system mapping and gaps analysis process, utilizing the Sequential Intercept Model (SIM). The SIM mapping was conducted with targeted participants at each intercept, representative of service providers, public entities, and project staff.

In July 2016, the Champaign County Mental Health Board was awarded a TA opportunity in which Policy Research Associates facilitated a virtual Intercept 1 Sequential Intercept Mapping (SIM) exercise with two other communities in the US. This activity initiated the effort to map the local criminal justice process in its entirety. Mappings of the remaining SIM intercepts were facilitated by JMHCP Program Director, Bruce Barnard. The mapping process identified current practices and results, to inform the development of system-wide goals and strategies. The CC SIM Map and chart can be found in Appendix A, following this report.

### *Recommendations*

Recommendations made by the Crisis Response Planning Committee, as a result of the gaps identified during the planning process, follow:

1. Establish a Behavioral Health and Justice Coordinating Council (BHJCC) to oversee all CJ/BH activities

2. Implement risk-needs-responsivity screening (LSI-R) at earliest point in the CJ process, to inform decisions throughout the system
3. Enhance initial response with provision of a Co-Responder Model
4. Provide behavioral health and case management support to the Public Defender's Office
5. Gather data to determine the level of need, capacity, and budget required to institute and maintain an Assessment Center – where LE can take persons with MI/COD, instead of jail or the hospital (envisioned to include assessment for MI, SUD, and Criminogenic Risk, crisis stabilization, emergency respite services, a living room model, and medical detox services)
6. Enhance reentry services specifically for the population with MI/COD
7. Ensure adequate resources and facilities for community behavioral health providers working in the jail

### *JMHCP Implementation Grant Application*

The RFP for implementation was released one year into the planning phase. Though the CRPC's work was not complete at the time the JMHCP Implementation grant application was prepared and submitted, the information gathered and progress made throughout the course of the project informed the application's direction.

The Council identified risk-needs-responsivity (RNR) screening, a co-responder model, and a formalized coordinating body as priorities to be considered for funding. The co-responder model became the focus of a local application. Therefore, in the interest of developing a program plan, which was achievable and coherent, we focused on the BHJCC and the screenings.

The BHJCC will monitor interactions of the CJ and BH systems, and analyze data from all stakeholders to look for opportunities for system and policy improvement across intercepts. In addition, the RFP made clear that RNR screening for criminogenic risk is an evidence-based practice that must be in place.

RNR had been discussed at length by the CRPC, and an assessment chosen, the LSI-R:SV, for implementation at the time of secondary screening for anyone identified during the screenings at booking as having a MI/COD. Yet, there was no funding available to support this next step. Therefore, purchase of the LSI-R: SV and related materials, as well as a case manager to administer this screen to the target population, in addition to the BHJCC, became the focus of the application. RCU will function as a sub-grantee of the award, employing the case manager administering the LSI-R:SV in the jail, and support staff to the BHJCC.

### **Additional Activities**

In addition to the JMHCP grant activities, Champaign County and its leaders in the criminal justice/behavioral health arena has been involved in a number of events and opportunities that relate to and enhance these efforts. Allen Jones, Bruce Barnard, Celeste Blodgett, and Claudia Lennhoff presented the project at a number of community events and meetings. In addition, in April 2016, Bruce Barnard, Sheila Ferguson, and Allen Jones submitted a guest editorial in the local newspaper, the News Gazette, to better inform the public of the issues related to criminal justice involvement for the population with MI/COD.

Local JMHCP leadership and project staff attended a number of conferences of or relating to this work. In December 2015, the Bureau of Justice Assistance (BJA) hosted a conference for all JMHCP grantees. Then, in April 2016, Champaign County was one of 50 sites, from 200 applicants, selected to take part in the first national Stepping Up Conference, in Washington, D.C. The event was sponsored by the National Association of Counties (NACo), APA, and BJA, and afforded participants the opportunity to meet with other communities throughout the United States doing this work.

In June 2016, a team of stakeholders from Champaign County (County Administrator, Rick Snider; State's Attorney, Julia Rietz; Chief Deputy, Allen Jones; and Executive Director of the Mental Health Board, Lynn Canfield) attended a workshop on data-driven justice (DDJ) practices at the White House. There, in addition to meeting with White House staff, the team met with 54 other communities to share knowledge and practices, and work collaboratively on solutions to reduce unnecessary incarceration, specifically for "super-utilizers," persons who cycle repeatedly through local resources (e.g., hospitals, jails, clinics, shelters, etc.).

Communities participating in the DDJ event were encouraged to respond to a Request for Interest from the Institute for State and Local Governance of the City University of New York (ISLG), which was executing a national study of frequent utilizers who cycle through the criminal justice, healthcare, and social services systems, and communities' lack of ability to provide this population with much needed services, despite various resources that are in place, often due to a lack of data and information sharing. Champaign County was accepted to be part of this study, and ISLG conducted the first round of interviews in March 2017.

Bruce Barnard, JMHCP Project Director, was invited to participate in the Criminal Justice Leadership Conference in Washington, D.C., in September 2016. The Leadership Conference was part of the Stepping Up Initiative, and correlated with JMHCP activities.

In February 2017, CIT ARMS data collection and reporting system was rolled-out, and the system became fully operational by April, 2017. After much work and coordination to accomplish this, the ARMS data system began producing CIT call reports for all Champaign County police departments.

Also in April 2017, Bruce Barnard was invited to present on timely implementation of validated screenings in county jails during two Stepping Up webinars. And, Bruce Barnard and Celeste Blodgett participated in the Pennington County Peer Justice Exchange that convened in Rapid City, South Dakota. The event was supported by NACo and the LJAF. Counties from across the United States, grappling with many of the same issues that we have been working to resolve in Champaign County, assembled to share information.

In June 2017, as a result of the community's involvement in the Stepping Up Initiative, previous involvement with the DDJ Initiative, and involvement with the NACBHDD Decarceration Initiative and Justice Committee, Allen Jones, Julia Rietz, Lynn Canfield, and Kyle Patterson participated in a Best Practices and Implementation Academy in Washington D.C. The DDJ initiative continues. While it was a White House project until November, it has since been undertaken by NACo. Lynn Canfield continues as the point of contact for this initiative.

In July 2017, Bruce Barnard assisted our TA Providers with training new JMHCP grantees in Washington D.C. In September, Bruce will take part in a Leadership Academy Problem Solving Workshop in New York City, which will further examine maintaining stakeholder support.

### **Conclusion**

The JMHCP planning grant has provided Champaign County with a valuable opportunity to strategize improvements to better meet the needs of persons with MI/COD, who come into contact with local law enforcement and the county jail. The co-administrators of the grant, JMHCP staff, and CRPC members, with input from community stakeholders, worked diligently to meet the requirements of the grant and make the most of the planning process. As a result of this initiative and the work of key stakeholders, Champaign County is now recognized as a leader in addressing behavioral health needs in the criminal justice systems, and has built a relationship with interest groups and government organizations involved in similar work, nationwide.

Going forward, many of the collaborators who have been involved since the outset of this initiative will continue to be involved in this work. The BHJCC should remain active and representative of the multiple community stakeholders, and active in pursuing coordination and integration of the community's criminal justice efforts.

Continued progress in these goals: 1) reducing the number of people with MI/COD booked into the jail, 2) reducing the length of time people with MI/COD disorders stay in the jail, 3) increasing linkage to community-based services and supports by people with MI/COD who are released from the jail, 4) reducing the number of people with MI/COD returning to jail, will require active involvement from multiple stakeholders, including those who have been directly involved in this effort. Further progress on these goals will largely be determined by our ability to build on this work and continue to improve cooperation and communication among public criminal justice authorities, community health and service providers, consumers, stakeholders, and community advocates.
