

A group of approximately 15 people are posed in two rows in a modern, brightly lit interior space. The background features large, curved red architectural elements. The top row consists of nine people standing, while the bottom row has about 15 people sitting on a low wooden ledge. Most individuals are wearing black t-shirts with a white logo. A large, semi-transparent white banner with a dark blue border is centered over the image, containing the text 'MedLaunch' and 'Introduction Meeting'.

MedLaunch

Introduction Meeting

Who are we?

- We spend a full academic year working on 6 projects that solve accessibility-related problems
- We work directly *with* our **community partners**, staying in constant communication and using their input throughout our process
- We learn about disability culture and how we can be **advocates for inclusion** on campus
- Professional development, disability advocacy, and socials

Human Centered Design

1. Empathize
2. Define
3. Ideate
4. Prototype
5. Test

HCD ensures solutions are accessible, increasing individuality for everyone. This allows products to give the most amount of benefit for the greatest number of people – all because users are involved in the design process!

Empower Art

- Community Partner at Stratton Elementary
- Special education classroom
- Loves to paint
- Wheelchair user and limited upper arm mobility

Work with us!

1. Find us at MedLaunch UIUC online!
2. Have a project or know someone we could work with?
