## NORTHEAST OGDEN DRAINAGE PROJECT - PHASE 2

### VILLAGE OF OGDEN, CHAMPAIGN COUNTY, ILLINOIS

March 30, 2022

**Project Description:** This project is intended to provide drainage improvements to the northeastern portion of the Village. The project encompasses 6 full blocks with North Street on the North, West Avenue on the west, Main Street on the south, and Willow Street on the east. 100+ year old, small diameter drain tile lines currently provide the only drainage outlets for this area. The project is intended to replace these drain tile lines with modern storm sewers. The project provides drainage not only within the immediate work area, but also provides improved drainage outlets for the existing drains within an additional 3 blocks of the Village.

This project was identified in the Village 2015 Comprehensive Drainage Study as a high priority project. This project is actually Phase 2 of the improvements. In 2020 Ogden spent over \$250,000 to construct a new large diameter storm sewer line extending from North Street, northerly approximately one (1) mile to outlet into the Union Drainage District #1 Main Channel. Areas of North Street, Kyle Street, Main Street, East Avenue, and West Avenue all experience chronic annual flooding. This project will reduce or eliminate those drainage problems. The project involves the installation of approximately 1,000 lineal feet of storm sewer piping, 9 manholes, street repairs, and other associated improvements.

**Why Funding Matters:** This project is considered to be the most urgent Village drainage project. Over the past 6 years, Ogden has spent over \$400,000 for drainage system improvements. The 2015 Village Comprehensive Drainage Study identified over \$2.0 million in additional drainage facility project needs. The Village faces a 20-year backlog of needed drainage improvements. An outside source of funding for drainage improvements is urgently needed.

**Estimated Project Construction Cost:** \$220,000

**Estimated Total Project Cost:** \$250,000

**Proposed Village Cost Share:** 50%

**Project Timetable:** Project under construction within 45 days ±

**Design:** Completed

**Permits:** Completed      **Bidding / Award:** 45 days ±

## RAIL TRAIL AREA DRAINAGE PROJECT

### VILLAGE OF OGDEN, CHAMPAIGN COUNTY, ILLINOIS

March 30, 2022

**Project Description:** This project involves the construction of approximately 3,800 lineal feet of stormwater drainage facility improvements, including 1,400 lineal feet of new storm sewer piping. The project is located along the western portion of the Kickapoo Rails-to-Trails project within the Village of Ogden. This project was identified in the 2015 Village Stormwater Drainage Study as a high priority project. It is intended to solve chronic flooding along Broadway Street west of Market Street as well as chronic flooding adjacent to the prior railroad right-of-way. Providing relief to approximately 40 parcels.

This project parallels the corridor of the Kickapoo Rail-to-Trail project being constructed during the Summer of 2022 by the Champaign County Forest Preserve District (CCFPD). The project is coordinated with and compliments the Rail-to-Trail project. The project involves the installation of small diameter storm sewer lines to replace 100 ± year old field tile piping that is no longer serviceable. It also restores the surface waterway that existed during long ago railroad operations.

**Why Funding Matters:** Ogden faces a backlog of over \$2 million in drainage facility improvements. The Village has spent more than \$400,000 over the past 6 years building drainage facilities. However, outside funding sources are needed if the Village is to significantly reduce the backlog of work. Although this is not the highest priority project for the Village, the construction of the Kickapoo Rail-to-Trail project in 2022 by the CCFPD allows Ogden to piggy-back this project with that work.

**Estimated Project Construction Cost:** \$160,000

**Estimated Total Project Cost:** \$190,000

**Proposed Village Cost Share:** 50%

**Project Timetable:** Project under construction within 100 days ±

**Design:** 30 days ±

**Permits:** 30 days ±

**Bidding / Award:** 45 days ±
